

DEFENSE & SECURITY

REAL-TIME 3D VIDEO

"All you do is plug in two cameras!"

- Unmanned/Manned Vehicles
- Submersibles...Tele-Robotics
- Battlefield Medicine-Surgery
- Remote Surveillance
- Transmit 3D Video Real-Time
- 3D IR & Night Vision (Option)
- ***No Computer Necessary!***

3-D Video Encoder

(Size: 10.5" x 8" x 3" ... 12V DC)

"Stereoscopic 3D video provides critical visual information that no single camera system can!!"

Easily display or project your 3-D video with . . .

3D/2D LC Monitors
Using simple passive
polarized 3D glasses
17" ... 24" ... 32"

**Lightweight, Low-Cost
Hi-resolution
HMDs**

**Our 3DI Telejector®
3D Projection System**
(26"H x 18"W x 13.5"D)

- **Two camera signals IN:** 3D video made easy ... all you do is plug in *two* video cameras
- **One video signal OUT:** The 3-D Video Encoder automatically encodes (multiplexes/combines) the two standard videos into one single field-sequential stereoscopic 3-D video or compressed "Side by Side" 3D video
- **Easily display, record, or transmit your stereoscopic 3-D video in real-time**
- **Standard NTSC/PAL video with both S-video and composite inputs and outputs**
- **Does not require gen-locked cameras ... use any cameras ... even IR and nightvision**
- **Real-Time ... no computer necessary!**
- **Multiple outputs ... you can display, record, transmit, and project simultaneously**
- **Provides an on-screen "split-screen" video mode for viewing/adjusting two cameras**
